

A red and white steam cleaner is shown against a background of white 3D cubes. A magnifying glass is positioned over the brand name 'Aromatic' on the device's handle. The text 'ECOVITA' is in a red oval above the brand name. Below the brand name, it says 'MULTI-PURPOSE STEAM CLEANER' and 'CLEAN WITH SUPER-DRY STEAM!' in green.

ECOVITTA STEAM CLEANER SMART, LIGHTWEIGHT AND COMPACT

Remove dirt and grime with only water

Steam cleaning is an easy, safe and cost effective way to get a deep down clean without the use of chemicals or detergents.

Deep clean and sanitise

Ecovitta Steam Cleaner generates superheated dry steam at temperatures high enough to kill dust-mites, germs, and bacteria such as e-coli and staph.*

* To sanitise surfaces, focus steam whilst cleaning for at least 15 sec. Results based on lab testing under controlled conditions. Results may vary based on the surface to be cleaned.

INSTANT STEAM GENERATOR

‘QUICK-START’ instant steam generator

Ecovitta Steam Cleaner uses an instant steam generator to produce continuous dry steam in just 30 seconds without pressurisation. Conventional boiler-based steam cleaners can take up to 15 minutes to pressurise.

‘EASY-CLEAN’ generator maintenance

Lime scale and mineral build-up in boiler-based steam cleaners reduces efficiency, resulting in increased power consumption and wet steam. Ecovitta Steam Cleaner uses no pressurised boiler and is the first and only system to allow ‘Easy-Clean’ generator maintenance at home.

‘VARI-STEAM’ gives you control

Ecovitta Steam Cleaner’s digitally-controlled variable steam flow technology allows the user to choose the right amount of steam for every type of cleaning requirement.

‘QUICK-FILL’ keeps you going

No boiler means no cooling time needed before you can top up the water chamber. This allows for continuous cleaning without disruptions.

VERSATILE 3-IN-1 CLEANING SYSTEM

Ecovitta Steam Cleaner combines the best of canister, handheld and upright cleaners to let you clean every type of surface around the house.

'AROMA-STEAM' makes clean smell good

Adding natural aromatic essences to Ecovitta Steam Cleaner's water chamber produces aroma-infused steam. Now your home not only feels clean but smells great too!
